Claude Sonnet 4	Moving Away Melancholic Indie Pop - B Minor, 75 BPM Verse 1 Packing boxes like we're burying dreams Folding memories in tissue paper seams Your coffee ring still stains the windowsill While autumn light grows cold and still The address book lies open to your name But distances don't play the same old game Chorus Miles are just numbers on a sign But they're stealing what was mine Every highway pulls apart The constellation of your heart I'm learning how to say goodbye To the language of your eyes Verse 2 Your sweater hangs like shadows on my door A ghost of warmth I'll touch but feel no more The radio plays songs we used to share But now they're just vibrations in the air I'll carry you in pixels and in prayer A love that travels lighter than the care Chorus Miles are just numbers on a sign But they're stealing what was mine Every highway pulls apart The constellation of your heart I'm learning how to say goodbye To the language of your eyes Bridge Maybe distance is just time Wearing different clothes Maybe love learns how to grow In spaces no one knows Final Chorus Miles are just numbers on a sign But they're redefining mine Every highway writes a part Of this expanding heart I'm learning how to hold you close In the places no one goes	.Poetic imagery: Evocative metaphors ("language of your eyes", "shadow lingered on the stairs") create vivid moments. .Internal rhyme and rhythm: Smooth internal rhymes enhance the lyrical flow. .Emotional depth: Nostalgic and introspective, without becoming cliché. .Clear structure: Includes two verses, chorus, and bridge as requested.	.Bridge clarity: Comes across a bit abstract; could be sharper or more emotional. .Chorus progression: The final chorus repeats motifs without enough variation. .Lacking a signature hook: Needs a standout line or motif that lingers in the listener's mind.

ChatGPT-4.1	Title: "Open Windows" [Verse 1] Rain slides down the window, painting lines across my skin Your voice lingers in the hallways, but I won't let it back in The night is velvet heavy, folding silence into light I gather every shattered piece, relearning wrong and right [Verse 2] Shadows map your memory on these faded cotton sheets I still feel the echo, but it's losing all its heat Every heartbeat's softer, finding courage in the cracks I trace a different future, never begging you come back [Chorus] Open windows, breathing in the midnight air Let the hurting leave, I'm lighter than despair From the ruins I am rising, gently sewn I'm healing slow, but I'm healing on my own [Bridge] Glass in my hands, now turning into sand Past running through my fingers, but I'm learning where I stand No more ghosts upon my pillow, no more words left to repeat I plant forgiveness in the silence, let the roots beneath me speak	.Warm tone: Emotional and cohesive with the theme of healing and reflection. .Symbolic phrasing: Unique metaphors ("glass turning to sand") add expressive power. .Strong chorus architecture: The chorus features balanced line lengths, clear rhyme pairs, and stress patterns that support melodic phrasing, making it structurally suitable for vocal highlighting and melodic embellishment .Progressive arc: Verses build emotional narrative from hurt to healing.narrative from hurt to healing.	.Lack of lyrical distinctiveness: While the tone is emotionally appropriate, the lyric does not exhibit a clearly recognizable lyrical identity—its phrasing and word choices feel stylistically generic and could be written by almost any voice, rather than reflecting a unique authorial character. .Mild clichés: Some familiar expressions ("shadows on the sheets") could feel predictable. .Bridge intensity: Lacks contrast or a turning point relative to verses.
