. **ESSENTIAL PARAMETERS for Writing Song Lyrics in ChatGPT :**

| Parameter | What to specify | Example |
|---|---|---|
| 1 🎵 **Musical Genre** | Genre and possible sub-genre | Modern R&B, Sad electro-pop |
| 2 💬 **Theme / Message** | What the lyrics are about, the core message | Healing after a breakup |
| 3 🔁 **Structure** | Number and type of sections | 2 verses + chorus + bridge |
| 4 😊 **Emotional Tone / Mood** | Overall emotional atmosphere (intimate, epic, melancholic, etc.) | Intimate and reflective |
| 5 🗣 **Language Style** | Formal, conversational, poetic, direct, metaphorical, etc. | Poetic with evocative imagery |
| 6 🎶 **Intended Melodicity** | Whether you want easily singable lines, internal rhymes, etc. | Yes, fluid and musical lines |
| 7 💿 **Musical References** | (Optional) Reference artists or songs | Labrinth – *"Jealous"* / SZA – *"Ghost in the Machine"* |

**.Note / Prompting Guidelines**

For best results, it is recommended to frame the prompt using the RCTO model (Role, Context, Task, Output).

Assigning a clear role (e.g., *"You are a highly established contemporary songwriter"*) helps the model adopt the appropriate stylistic, technical, and creative perspective.
